

Milestone 2

CMPT 215

Due: July 20th, 2017

Total: 25 marks

In this milestone you will be adding two new sections:

- Design specification
- Goals

1 Description

Review and correct any comments on milestone one from the markers grading. Then add the following sections to your teams document:

2 Design specification

Explain the overall design of the program and provide a flow chart of how the program works. List any of the following information:

- procedures you will need to make,
- implementations of data structures or algorithms,
- display type.

Provide any information of visuals:

- console vs. graphic display?
- 8 bit, 16 bit display?
- include any mock designs.

3 Goals

Revise or list out the goals you are going to complete for this project and include extra goals if you have time. If you have achieved any already then mention it. If you included goals in milestone 1 and changed them then explain why.

4 Submission

Only one PDF document and svn log needs to be submitted per team. The document should contain:

- Team name
- Team members name and nsids
- Project name
- Project description
- Project design
- Project goals

5 Mark break down

- svn log (1 mark)
- writing (10 marks)
- Description (5 marks)
- Design (5 marks)
- Goals (4 marks)
