

Final Report

CMPT 215

Due: Aug 15th, 2017

Total: 50 marks

Revise all sections and add as much detail, diagrams and information about your completed program. Add one last section on Failures explaining any problems or failures that arose in the project.

1 Description

Describe your overall project in what it can do and the main goal of the application.

2 Design specification

Explain the design of the project. Including details on code, data structures and algorithms used in the code.

3 Goals

List of goals that were completed, not completed and explain if any changes had to be made to the list and why.

4 Readme

Provide steps to run your code.

5 Sample Output

Provide sample output of your code or images that show your program works.

6 Failures

Explain anything that went wrong or that was difficult.

7 Submission

Only one PDF document, source code and svn log needs to be submitted per team. The document should contain:

- Team name
- Team members name and nsids
- Project name
- Project description
- Project design
- Project goals
- Readme
- Sample Output
- Failures

8 Mark break down

- svn log (5 mark)
- writing (10 marks)
- explanation of the current work (15 marks)
- sample output (5 marks)

- source code (15 marks)

Note: For source code, markers will be looking for comments and if the code can start up. It does not need to work properly but it will need to match your sample output.
