Milestone 3

CMPT 215
Due: Aug 3rd, 2017
Total: 25 marks

1 Description

Make any necessary changes based on development and comments from the marker.

2 Design specification

Make any necessary changes based on development and comments from the marker.

3 Goals

List the goals that are complete and not completed.
Add any explanation for goals removed, not completed (past the deadlines) or changes.

4 Readme

Provide steps to run your code, include which simulator to use and how to use the simulator with the code.
Assume the markers have never compiled MIPS before.

5   Sample Output

Provide sample output of your code or images that show your program is working.

6   Submission

Only one PDF document, source code and svn log needs to be submitted per team. The document should contain:

- Team name

- Team members name and nsids

- Project name

- Project description

- Project design

- Project goals

- Readme

- Sample Output

7   Mark break down

- svn log (1 mark)

- writing (5 marks)

- explanation of the current work (5 marks)

- sample output (4 marks)

- source code (5 marks)

Note: For source code, markers will be looking for comments and if the code can start up. It does not need to work properly but it will need to match your sample output.
